

SN. 09/876,179

ATTORNEY DOCKET No. WATA:012

IN THE CLAIMS:

Kindly replace claim 1 with the following corresponding replacement claim:

SUB
B' 7
A' 1

--1. (Amended) A substrate for a reflection type liquid crystal display element, comprising:
a transparent substrate; and
a reflective mirror formed on top of said transparent substrate;
wherein said reflective mirror comprises a predetermined number of high-refractive-index first transparent films composed of a first dielectric material and low-refractive-index second transparent films composed of a second dielectric material laminated alternately on said transparent substrate, and
wherein either or both of said first transparent films and said second transparent films are arranged such that a film thickness thereof increases progressively or decreases progressively with distance from said transparent substrate to suppress occurrence of ripples in an optical spectrum or optical transmission spectrum across a visible region.--
